Hi Helen,

Attached is Ecology's comment letter (comments and recommendations) on the draft ROD Amendment (Part I) at the Wyckoff/Eagle Harbor Superfund Site.

Ecology appreciates for the opportunity to review and comment on the draft ROD Amendment (Part I), which addresses contamination remaining in the intertidal beaches and construction of concrete reinforced wall at the Wyckoff/Eagle Harbor Site. As always Ecology is looking forward to continuing to work with EPA in moving cleanup action ahead. Thanks.

Please note that final Tables 4 and 5 attached that replace earlier versions of these tables sent to you last Friday. Should you have any questions/concerns, do not hesitate to call me at 360-790-0876 (my cell) tomorrow (bet 12 to 4pm). Again thank you.
